Hi Alyssa and Zach -

I thought I once saw where to submit comments, but I can't find it now and I see no updated contact information for the Planning Bd.

Please accept these comments for the 2/15 Planning Bd meeting -

### **Comments to the Dalton Planning Board concerning a solar installation on the Warren landfill -**

1. that negotiation of a contract for remuneration to the town include input from an expert who knows what sorts of things we could ask for beyond back taxes
2. that this solar installation won't consume an amount of capacity on the line that would preclude the town investing in its own solar on the town landfill. In the past, the cost of connecting was enough to turn many solar projects away from this location. Now that the installation on Petricca property has paid for a line; others can connect, but the total capacity is limited. Town-owned solar could be a great investment.
3. that expertise in the town is not being utilized – see Richard Hall
